| Programme         | 13 Weeks                           |
| Location          | Kidbrooke, Greenwich, South London |

### Key Features

Refurbishment of the art and music block inclusive of facilitating works, structural provisions, finishes, sanitaryware, FF&E, and mechanical & electrical installations with associated external works.

### Project Summary

Following limited asbestos removal, we completed an internal soft-strip to remove aging features and prepare the structure for re-finishing.

Additional below ground drainage was installed through the ground floor slab to provide additional facilities for the changing needs of the academy.

Reinstatement works comprised internal finishes to re-position the visual arts block to support delivery of the new syllabus, providing staging, preparation and creating spaces for visual arts production, practice and performance.

Minor external works were also included in the scheme, providing step-free access to the new facility, bringing the existing structure into line with current access requirements, again, extending the life of this resource and promoting inclusion across the student body.
